COUNTRY : USSR

SUBJECT : Projected Soviet Space Launchings

50X1-HUM

According to a Soviet general officer with missile responsibilities not related directly to the space program, the USSR is preparing to launch two astronauts in one capsule, in order to impress the world with new achievements of Soviet science. The two-man capsule has been completed, and is now undergoing testing at Korolev's Bureau at Podlipki. Rockets are also being prepared for launchings to Venus and Mars.
